For more information please call 705-746-9522
or visit www.foreverychild.ca

NOTE: Programs are cancelled if school buses are cancelled.

EarlyON Child and Family Centre

West Satellites

Month: **November 2019**

How Does Learning Happen? Learning is organized around four foundational conditions that are important for children to grow and flourish: Belonging, Well-Being, Engagement, and Expression. These are a vision for **all** children's future potential and a view of what they should experience each and every day. They are aligned with the Kindergarten program.

EARLYON **Program times:**
9:30-12:30pm

Monday- Humphrey Community Centre

Tuesday- Foley Agricultural Hall

Wednesday Rosseau Memorial Hall

Thursday - Humphrey Community Centre & Nobel School

Friday - Orrville Community Centre

Here are some things you might see this month!

Belonging

Sharing with new friends
Singing songs together

Belonging refers to a sense of connectedness to others, an individual's experiences of being valued, of forming relationships with others and making contributions as part of a group, a community, the natural world.

Well-Being

Exploring physical movement
Exploring our feelings

Well-being addresses the importance of physical and mental health and wellness. It incorporates capacities such as self-care, sense of self, and self-regulation skills.

Engagement

Puppet and felt stories
Fine motor activities

Engagement suggests a state of being involved and focused. When children are able to explore the world around them with their natural curiosity and exuberance, they are fully engaged. Through this type of play and inquiry, they develop skills such as problem solving, creative thinking, and innovating, which are essential for learning and success in school and beyond.

Expression

Learning new numbers
Learning the letters in our names

Expression or communication (to be heard, as well as to listen) may take many different forms. Through their bodies, words, and use of materials, children develop capacities for increasingly complex communication. Opportunities to explore materials support creativity, problem solving, and mathematical behaviours. Language-rich environments support growing communication skills, which are foundational for literacy.
